

NEW POLICY RESHAPES THE REFINED PRODUCTS MARKET

The Federal Official Gazette published today a Public Policy on Minimum Storage of Refined Products issued by the Ministry of Energy (“Policy”), which mandates storage permit holders to maintain minimum inventories of fuels in all regions of the country to guarantee the supply of said products, fostering the increase and modernization of storage infrastructure in Mexico.

This Policy will reshape current refined products market, requiring from participants in the Downstream to carry out certain actions to comply with the mandatory inventories and opening opportunities for investment in the Midstream.
